

# Naturalist Intelligence

Nature smart: discriminate well among living things

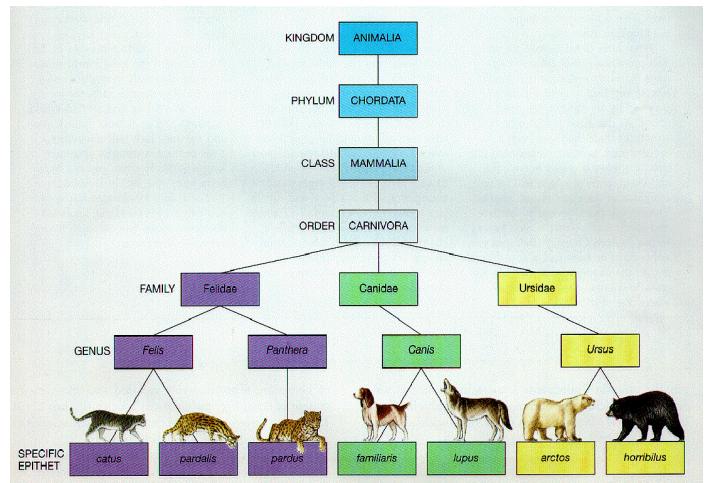

## Possible opportunities

Botanists, biologists, farmer, naturalist, animal behaviorist, and scientist.

## You Are a Naturalistic Learner

Your mantra: Let's investigate the natural world.

Naturalistic learners often understand the patterns of living things, and they apply scientific reasoning to the world. You recognize (and can classify) different types of plants or animals. You also empathize with animals.

## Tips for the way you learn:

- Observe and record data.
- Create a "living system" for the material you are trying to learn. Imagine the new material as an ecosystem or a pattern for you to figure out.
- Write about nature, daily life, or people as a topic so you become engaged in your assignment.

**"It is not the strongest of the species that survives, nor the most intelligent that survives. It is the one that is the most adaptable to change."** Charles Darwin
